CLEVERTOUCH[®] / Connecting people with technology

LUX June Update.

New design. Fresh look. Easy to use.

#clevertouch

What's new for Plus Series?

1.

New redesigned icons – welcome to Clevertouch Squircles.

2.

Note app now called Whiteboard across the whole Clevertouch Range.

Whiteboard icons have changed but all the features are still the same. We have refreshed the interface to be simple and clean.

4.

New options added in the navigation menu. Opening from the finder now has Cloud Drives options. Cloud Storage option now allows saving in native format. You can also save ENB format to Google Drive or OneDrive allowing Whiteboard files to be opened on other boards to continue collaboration.

			×	1	A	8-1	٠	ŧ	r ₀	÷	۲	*	*			+	<	1/1	>

Updated image formats that can now be imported directly into Whiteboard.

6.

Export files as PDF, IWB or SPG within Whiteboard.

* 🖊 🗵 🔿 📅 🍬 👻

7.

+ < 1/1 >

The background menu has been expanded with more colours, and you can now build a library of Custom Backgrounds.

≡ ⊗ ⊞

Added ability to generate QR codes for sharing Whiteboard files as a PNG (users must be on the same network for this to work).

9.

Handwriting Recognition has been added.

Maths recognition – we have added maths formulae recognition. Select the maths tool, writing your formula followed by =? Then press the arrow, this inserts the formula. To reveal the answer, select the pen tool and swipe through the formula to reveal your answer.

Brand new files app – we have created a much more intuitive system based on user feedback and familiarity with popular operating systems. All actions are now in the 'cog' menu. Different views are from the top menu, and cloud drives can be accessed from the left-hand menu.

Within Settings – the new start up and shutdown folders will ensure all your content is deleted. This includes browser history, as well as cloud and email accounts. This can be selected from the start up and shutdown menu as well as initiated from the side bar 'bin' icon.

13.

Welcome to your floating toolbar and your annotation tools. Call the pen over by a holding two fingers on the screen for two seconds. Updated annotation tools include handwriting recognition, that opens a mini browser on the associated search term. Plus new pen and highlighter options such as selecting default colours.
